Summary

With 1 year of experience in front-end development, I specialize in building high-performance web applications using ReactJS. My projects have consistently resulted in improved performance and user satisfaction. I bring a proactive approach to project leadership and technical innovation.

Work Experience

SoftGrid Info Pvt.Ltd

Front-End Developer

Chandan Nagar, Pune

August 2023–Present

- Utilized Agile methodologies, including Scrum and Kanban, for efficient project management.
- Developed and maintained user-friendly web interfaces using React.js, JavaScript, HTML, CSS, and Bootstrap.
- Collaborated with backend developers to integrate APIs and ensure seamless functionality.
- Implemented responsive design techniques to optimize web applications for various devices and screen sizes.
- Participated in code reviews and team meetings to ensure high-quality code and project progress.

Projects

BrightInfoTech:

- Developed a dynamic web application for BrightInfoTech using React.js and Bootstrap. The project aimed to enhance user experience, streamline information access, and ensure responsive design across various devices.
- Implemented different pages and routes for Login, Products, Product details using React Router components Route, Switch, Link, props, state, lists, event handlers, form, inputs.
- <https://bright-infotech.onrender.com/>

Chips App:

- Created a mobile-friendly application for chip ordering using ReactJS and Bootstrap.
- Utilized HTML, CSS, and JavaScript to create a responsive and interactive user interface.
- Implemented features such as product listings, order forms, and user authentication.
- Ensured cross-browser compatibility and optimized performance for various devices.
- <https://github.com/tejesh15789/Chips>

Note Taking App:

- Designed a note-taking application using React.js with a focus on a user-friendly interface and efficient data storage.
- Utilized React hooks such as `useState` and `useEffect` to manage state and side effects.
- Implemented CRUD (Create, Read, Update, Delete) operations to manage notes effectively.
- Applied React Context for state management across different components.
- Used `localStorage` to persist notes between sessions.
